### DETAILED ACTION

1. The amendment filed 7/18/2003 (paper no. 14) is acknowledged and entered into the record. Accordingly, claims 1-7, 11, and 14-17 are canceled without prejudice or disclaimer, claim 22 is newly added. Claims 8-10, and 12-13 are withdrawn from further consideration as being drawn to a non-elected invention. Applicant is reminded to cancel all claims drawn to non-elected inventions.
2. Claims 18-22 are examined on the merits.

### *New Arguments*

#### *Double Patenting*

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 18-22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 5-11 of U.S. Patent No. 6,063,620. Although the conflicting claims are not identical, they are not patentably

Art Unit: 1642

distinct from each other because the claims of the instant invention are drawn to the same product as that previous claimed in US patent 6,063,620.

The claims of the instant invention are drawn to a diagnostic kit comprising a monoclonal antibody that binds to an AT1 subunit of the angiotensin II receptor, wherein the monoclonal antibody is capable of binding to SEQ ID No: 1, and wherein the monoclonal antibody is attached to a detectable label. The claims are also drawn specifically to a monoclonal antibody that is produced from the hybridoma deposited under accession number 930720117.

One of ordinary skill in the art would have found it *prima facie* obvious to make a diagnostic kit based on the teachings of US Patent 6,063,620, because the products of both the instantly claimed invention and that of the US Patent are drawn to the products *per se*, and thus the intended usage of the product as a diagnostic kit does not breadth any patentable weight into the claims.

**All other rejections are withdrawn in view of the applicant's arguments and or amendments thereto as set forth in paper no. 14.**

### ***Conclusion***

No claim is allowed.
